# Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for contents of text-input area

Checker Input

Show ☑ source ☐ outline ☐ image report

Options...

Check by [text input ⬍] ☐ CSS

```
  <p class="content">It must be objectively clear that an error was made during grading. Examples
of such errors include a grader incorrectly summing points or incorrectly marking something not
completed. Grades based on the judgement of the grader, except in extremely extenuating
circumstances, will not be regraded. In particular, grades for categories like "Site is Visually
Appealing" will not be regraded. All regrade requests must be submitted by email to
cse330ta@gmail.com within one week of grading. Requests submitted after this deadline will not be
considered. Requests must contain a specific explanation of the error, including filenames and
line numbers of code, if appropriate.</p>
  <div class="card searchcard">
    <form action="https://duckduckgo.com" method="GET">
      <p class="paragraph">you know it will goto the DUCKDUCKGO:</p>
      <input type="text" name="q">
      <input type="submit" value="SEARCH">
    </form>
    <h1 class="title">hello:)</h1>
```

Check

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering

Document checking completed. No errors or warnings to show.
